Alireza Soheili Front-End Devlopment

alirezasoheili8080@yahoo.com | Tehran | 28/12/1995 | Github | Linkedin

Profile

Motivated and aspiring junior front-end developer with solid understanding of React and passion for learning. Through personal projects, I have gained practical experience in creating web applications. I have a strong willingness to stay updated with the latest industry trends. Although I am primarily focused on front-end, I have a basic understanding of back-end technologies, allowing me to collaborate effectively with back-end teams.

Skills

JavaScript	Typescript	CSS3/Sass
Tailwind	**React**	**Git**
daisy-ui	react-router-dom	
shadcnui	redux/redux-toolkit	
	zustand	
NextJs	react query	
trpc		
next-auth	**MUI**	

Less Familiar Skills

Testing	PWA	NodeJS
jest		
vitest	**Prisma**	**NestJs**
RTL		
Express		

Languages

English ● ● ● ○ ○

Projects

iSupport ⧉
I developed a simple ticket support application for Apple, using React and tailwind for UI, redux-toolkit for state manager and leveraged Express and Mongoose to handle the application functionality, database interaction and JWT for secure authentication and authorization.

Votey ⧉
Simple voting app,using Next JS full potential as a fullstack framework, utilize type safety of trpc as back-end library and prisma orm to work with mysql db provided by planetscale.

Hulu Front Page Colon ⧉
A near pixel perfect colon of Hulu front page website using html, vanilla css and javascript.

Next Nest JWT Template ⧉
This app is built using the combination of NestJS and NextJS frameworks, providing server and client-side access-token and refresh-token JWT authentication with Passport and Jotai as state manager respectively.
